

▶ Seamless MySQL KM for BMC® Performance Manager

Monitor MySQL Instances Quickly and Easily

The Seamless MySQL KM for BMC Performance Manager allows its users to quickly and effectively monitor all distributed MySQL instances. The 70+ collected database performance metrics are available from within the BMC Performance Manager monitoring environment. The Seamless MySQL KM for BMC Performance Manager is robust and offers enterprise-level performance, availability and capacity related metrics.

The Seamless MySQL KM for BMC Performance Manager solution contains knowledge in the form of scripts, parameters, and recovery actions. This knowledge is used by BMC Performance Manager to monitor, analyze, and manage a MySQL installation.

▶ FEATURES

- Full support for MySQL Database connection types TCP Port/Socket—Named Pipe/Shared Memory
- Full support for multiple instances and databases on the same system
- Full support for custom socket files configured with locations anywhere on the monitored system
- Easier configuration through error checking to verify Knowledge Module configuration credentials
- Enhanced GUI to support multiple instance and database configurations
- Mass Roll-outs supported through Patrol and Configuration Manager
- New parameter definitions to support latest MySQL versions

Providing visibility into the status and reliability of your MySQL environment

Ⓐ KEY FUNCTIONALITY

MySQL instance

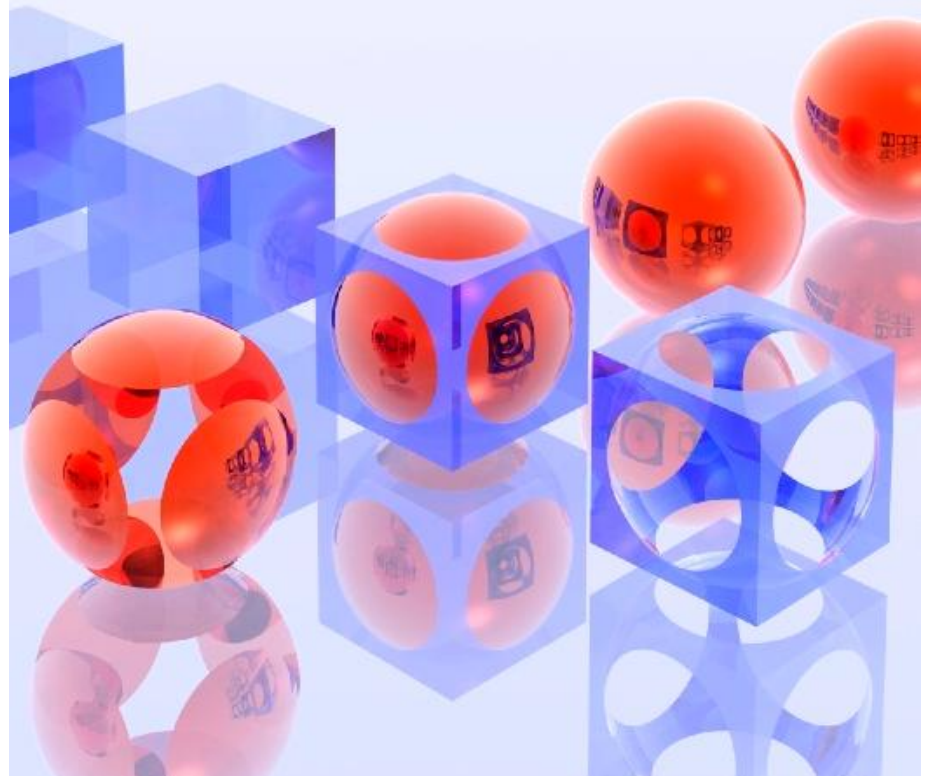

Tablespace activity

User activity

Database space and usage

Replication Activity

Multithreaded server activity
